Designer
Area DKI Jakarta

Ringkasan

As a Project Manager at PT. Mahakarya Sukses Indonesia, I contribute to project coordination and management by leveraging my educational background in computer and information systems from BINUS ONLINE and information technology from Telkom University. My role emphasizes ensuring seamless project execution while collaborating with teams toward shared objectives.

With a strong foundation in image design, graphic design software, and artworking, I bring a unique blend of technical and creative skills to my work. My goal is to consistently integrate technology and design to achieve impactful results that align with organizational priorities.

Pengalaman

PT. Mahakarya Sukses Indonesia
IT Developer and ERP Project Manager
Maret 2025 - Present (1 tahun 2 bulan)
Jakarta Raya, Indonesia

- Strategic Vendor Collaboration: Acted as the primary point of contact for external Odoo partners and vendors, managing service level agreements (SLAs), and ensuring that all third-party deliverables met the company's quality standards and technical specifications.

- Odoo 18 Full-Cycle Implementation: Spearheading the end-to-end digital transformation using Odoo 18, strategically aligning system architecture with complex business processes to drive operational efficiency.

- Cross-Functional Leadership: Leading a hybrid team of internal developers and external vendor consultants to deliver high-impact ERP solutions, focusing on modular integration, seamless data migration, and performance optimization.

- Project Governance & Lifecycle Management: Overseeing the entire Software Development Life Cycle (SDLC)—from initial requirement gathering and GAP analysis to User Acceptance Testing (UAT) and successful go-live deployment.

PT. Maju Express Indonesia

IT Support Specialist

Maret 2024 - Maret 2025 (1 tahun 1 bulan)

Jakarta Raya, Indonesia

- Provided comprehensive technical support and system administration for Odoo 16, ensuring high availability and performance of the ERP environment.
- Managed technical troubleshooting, server-side configurations, and security access controls to streamline daily operational workflows.
- Collaborated with internal departments to identify system pain points and implemented technical fixes to improve user experience and data integrity.

PT. Omni Teknologi Global

Functional and Technical Consultant

Januari 2023 - Maret 2024 (1 tahun 3 bulan)

Kota Tangerang

- Developed and customized core modules within the Odoo 15 ecosystem, utilizing Python and PostgreSQL to meet specific business logic requirements.
- Managed cloud infrastructure deployment on DigitalOcean, implementing DevOps best practices to ensure seamless continuous integration and delivery (CI/CD).
- Built and maintained custom reporting tools, significantly enhancing data visibility across the organization.

PT. Jasa Medivest

Transport Coordinator

Mei 2021 - Januari 2023 (1 tahun 9 bulan)

Karawang, West Java, Indonesia

- Hazardous Waste Logistics: Managed the complex end-to-end logistics for Medical Biohazardous Waste (B3), ensuring all operational activities complied with strict national environmental and health safety regulations.

- Operational Resilience & Crisis Management: Successfully maintained 100% service continuity during a high-pressure transitional period, overseeing the safe collection and transportation of infectious materials.

- Safety & Compliance Oversight: Enforced rigorous Standard Operating Procedures (SOP) for handling hazardous materials, minimizing operational risks and ensuring the safety of field personnel and the environment.

- Resource Optimization: Coordinated fleet scheduling and routing for specialized transport units, optimizing response times and resource allocation under stringent regulatory frameworks.

PT. Astra Graphia Information Technology (AGIT)

Datacenter Operator

Februari 2018 - Oktober 2020 (2 tahun 9 bulan)

Tangerang, Banten, Indonesia

- Ensured 24/7 operational stability of Tier-3 data center infrastructure by monitoring critical systems using SolarWinds and Centreon.

- Executed rigorous preventive maintenance schedules for server hardware, networking equipment, and environmental monitoring systems (Fire Safety & Cooling).

- Collaborated with the infrastructure team to respond to critical alerts, minimizing downtime through efficient incident management and root cause analysis.
